"A Remarkable Discussion." During the tariff debate in the House two Republican members from Massa chusetts succeeded in carrying loy, into the Democratic camp by an attack upon the new tark? bill. One of them, Mr. McCall, is the same Representative who won a little Democratic appliques la some of the election cases in the last session when he considered a more technicality of the law as of more importance than admitted evidence of fraud on the part of the Democrats. The other was Mr. Livering Neither gentlemen made a creditable appearance and build were roundly-scored by the Republican members of the Ways and Mesns Committee.

Mr. Lovering in particular was handled without gloves and was convicted of bad faith. He is a manufagturer and declared on the floor of the ness, Bad Tatein, the Mouth, Ccated Torque Rouse that the manufacturers did not rain in the Side, TORPED LAYER. They want the duty on cottons as fixed by th a Regulate the Dowels. Purely Vegetable. bill. This was too much for the members of the Committee or Ways and Small Pill. Small Price. duty was reported as the result of the representations made by the manufadincluding the Massachusetth member, Mr. Lovering, Mr. Russell, of the committee, said:

In all candon and kindness, I sak if it does not come with noor, grade from him toask for this provision and then declare against the bill. The committee is not auxious to press this amendment. We are ready to leave it to him.

Mr. Bussell then waited for an answer. but the gentleman from Massachusetta realizing the predicament in which he had placed himself did not utter a word. fils attack upon the bill was not sincere and he did not dure assume the responstbility of accepting the challenge thrown down by Mr. Russell on the part of the committee and let the amendment go. Mr. Dingley then took the floor and h was not surprising that he characterized the debate as a "remarkable discussion. It was the 'unanimous' slatement of the cotton manufacturers that they could not hald their own in the manufacture of the finer grades without the duty sixed in this bill. . The existing law had a sufficient duty on the coarser goods. manufactured in the South, but the New England manufacturers, including Mr. Lovering, testified to the necessity of the increases contained in the bill.

If Democratic applause could compensate the gentleman from Massachusetts he had his fill, but it was at best a poor compliment to him and to the State which in part he represents, especially in view of the exposure that followed

Just as Lincoln Proposed. Some amusing features grop out in the tariff debate in the House. At a recont session a member longed for one hour of Abraham Lincoln's matchless patriotism. It happened that during the debate on the same day Congressman Dolliver, of

With the property of the season of the country of the season of the country, and it than the proof of the country, and it than the proof of the country, and it than inversed before the realers the accomplishments of science, and, and letters for, the instruction of the human mind and the amelioration of human conditions and of manager, and of manager, and the amelioration of human conditions and of manager, and the medical principles of the season of the seaso Now, in my judgment, it is not an acclient that three Democratic Administrations, far spart in time, have spent all their spars moments in consultation with syndicates about bonds. The tariff reform habit and the bond habit, bistorireform habit and the bond habit, bistorically considered, appear to be kindred infirmities, originating in the same cause and manageable by the same remedies; by a Poppase to hardle them to-dayaractive and the same and the same of the considered to handle itself. But the considered to the Whig members of the Hilmois Legislatura, he drew up and published an address to the people of that State, and, according to the newspaper which I have been offered the resolution which [hall read, in your Die resolution which has loved, in one der that you may see how perfectly akin Dingkylem and Liecolnica are when examined in the light of history.

This is the resolution: his is the resolution:
